

# Pick a unit

## Sheet 1

Find or suggest five things that would be measured in:

1. Metres (m)
2. Centimetres (cm)
3. Millimetres (mm)
4. Kilograms (kg)
5. Grams (g)

Choose three of them to measure accurately in the unit you have chosen.

### Challenge

Can you write down what some of your items would be in the 'wrong' unit (e.g. a person who was 1m 23cm can also be described as being 123cm tall or 1230mm tall).
