

Day 4: Realise that addition can be done in any order.

Day 4: Realise that addition can be done in any order.

Day 4: Realise that addition can be done in any order.

Two small clothes hangers are shown. The top one has 2 yellow pegs and 7 red pegs. The bottom one has 7 red pegs and 2 yellow pegs. A thought bubble above the top hanger says "We got the same answer!". A thought bubble above the bottom hanger says "Which order was easier?".

$2 + 7 = 9$

$7 + 2 = 9$
