

Adding decimals

Sheet 2

Round each number to the nearest whole number and add to make an estimate.
Add each pair of numbers to find an exact total.

1. $67.8 + 35.9$

2. $45.8 + 26.7$

3. $5.42 + 6.37$

4. $4.48 + 3.27$

5. $5.63 + 2.84$

6. $6.57 + 2.48$

7. $7.85 + 4.56$

8. $37.2 + 4.28$

9. $24.6 + 3.84$

10. $47.4 + 8.7$

11. $3.78 + 21.8$

12. $45.5 + 2.52$

How accurate were your estimates?

Challenge

Janie says that adding 36.2 to 9.77 gives an answer of 133.9.
What advice would you give her?
