Division with remainders

Sheet 1

Solve these. If there are any remainders, write them as fractions. Simplify the fractions where you can.

1. $844 \div 4$

2. $639 \div 3$

3. $489 \div 4$

4. $368 \div 3$

5. $558 \div 5$

6. $872 \div 4$

7. $575 \div 5$

8. $524 \div 4$

Challenge

Which number divides into 314 to give an answer ending $\frac{1}{3}$?
