How to make a clay burr

You will need:

Air-drying clay

Clay board

Clay tools

Roll a piece of clay into a ball.

Using your fingers, pinch the surface of the wall and pull gently. This will make spikes. Do not stick extra clay spikes onto the ball. They will fall off when it dries.

Pinch the clay and pull spikes all over the ball, until the whole thing is spiky.

Bend the spikes over a little to make hooks. These are the bits that attach to animals' fur and help disperse the seed.
