

Addition and Subtraction Unit 4

Problem solving and reasoning questions

Write two numbers which total 91 where one has a 1s digit of 6.

Write the missing digits:

$$7 \square + 48 = \square 24$$

$$\square 5 + 87 = 14 \square$$

How many pairs of numbers between 20 and 30 can you find that total 51?

These questions should be provided for children to do once the unit has been completed. They assess the children's mastery of the skills and concepts in this unit.
