

Multiplication and Division Unit 3

Problem solving and reasoning questions

Write 3 pairs of numbers which give a product of 24 when multiplied.

Write the missing numbers:

$$\square \times 3 = 36$$

$$8 \times \square = 32$$

$$14 \div \square = 7$$

What is the remainder when 34 divides by 4?

Divide 29 by 2 then by 3, then by 4, then by 5. What will the remainder be if you divide it by 10?

What number will divide into 34 and leave a remainder of 4?

These questions should be provided for children to do once the unit has been completed. They assess the children's mastery of the skills and concepts in this unit.
