

Day 2: Add a single digit to a 2-digit number by bridging multiples of 10 using knowledge of pairs to 10 and place value.

How many beads do we need to make 30?

We are going to find $26 + 7$.

How many more do we need to add?

What is the answer?

Day 2: Add a single digit to a 2-digit number by bridging multiples of 10 using knowledge of pairs to 10 and place value.

How many beads do we need to make 30?

We are going to work out $25 + 8$.

How many more do we need to add?

What is the answer?

Where is that on the line?
