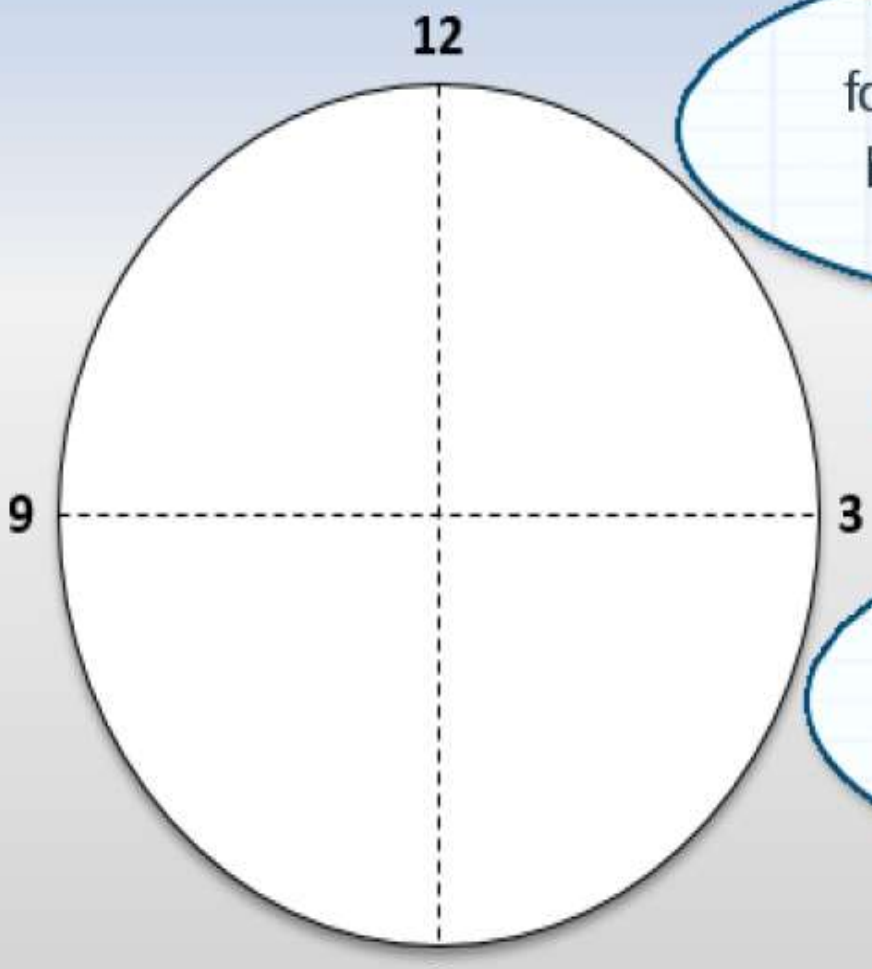
Day 3: Read time on analogue clocks to nearest quarter hour.



Fold your circle in half. Now fold it in half again so that you have 4 equal parts. What do we call these parts?

The circle is a bit like a clock face. Let's put 12 at the top.

3 is a ¼ of the way round the clock face. When the minute hand is here, it is ¼ of an hour past an o' clock time.

When the minute hand is at 9, it has $\frac{1}{4}$ of an hour to go until the next o' clock time.

6 goes at the bottom.

Day 3: Read time on analogue clocks to nearest quarter hour.

On this clock the pink tells as 'past' times and the blue tells us 'to' times.

Now it's ¼ of an hour after 9 o' clock. We can write that as quarter past 9 or ¼ past 9.

Day 3: Read time on analogue clocks to nearest quarter hour.

On this clock the pink tells as 'past' times and the blue tells us 'to' times.

Now it's only ¼ of an hour before 10 o' clock. We can write that as quarter to 10 or ¼ to 10.
