

## 7.1: Rectangles and triangles

### **Learning Objective:**

Divide able to refine knowledge of area of rectangles after dividing rectangles in smaller rectangles.

Draw a line to divide paper in 2 halves and label one half with its area.

Draw a line to divide other half in two halves and label one half with its area.

Continue halving and labelling this until there is no more space left for drawing.

Measure the sides of each square and rectangle.

Describe what did you notice about the different areas, sequences of squares rectangles.
