I. Create a power point showing the computing tools. You must consider following points while creating your presentation. You can use internet to do your research on the given topic.

[Data loggers, Spreadsheet, Database, Document production tool]

1. Selecting eye-catchy title for your presentation

2. Inclusion of clear and eye-catchy images of **spreadsheet**, **database** and other software's.

3. Content is very clear and easy to understand about the images.

4. Use animations and transmission to make your presentation attractive.

5. You are able to save your work.

II. You have been given a story of a program. Using this story you have to create scratch program using scratch software.

In this program there should be two sprites, **rabbit** and **girl**.

The rabbit sprite should move to **100 steps forward** when green flag is clicked.

The backdrop should switch to blue sky when rabbit is clicked on.

When the backdrop switches to blue sky, the girl should ask:

- **Hi**

- **How are you?**

When girl is clicked on:

- The backdrop should switch to **random backdrop.**

- Girl should say" **Welcome dear**".
