YOUTH LEADERSHIP PROGRAMME
FOR THE MONTH OF FEBRUARY.

1.

THIS MONTH IN GRADE 5B

This was a very exciting month and our students took part in a lot of enriching activities for YLP before the exams started.

5B went to the Kaharama awareness park.

Students just love it when fun and learning happen together. This YLP field trip is a perfect example of that. Students learnt how mechanical energy can be converted into electrical energy while exercising in a sustainable gym. They came up with ideas such as using their riding cycles so they can charge their phones while they save fuel by not using cars for commute.

SURVEYS

5B students very enthusiastically took part in conducting survey. They created their own questionnaires and went to different classes to impart their knowledge and also practice presentation skills.

Many students came to 5B to conduct surveys for their YLPs also.

3.

MAKING MODELS

My students, very enthusiastically took part in the model making. We initiated making our sustainable city model. Students enjoyed the process a lot and collaborated very effectively. I could see them take ownership of their work and taking personal interest in the project.

UP COMING EVENTS

We have planned another field trip to the Qatar National Library very soon. Students have been coming up with wonderful and creative ideas to work on. The upcoming month will be the final part of our YLP journey and we will be taking things very seriously.

THANK YOU

I want to thank you for supporting your child so far and helping them contribute to our YLP.

I look forward to a continued support till the end so our fruitful collaboration can bring success to our class's YLP project and presentation.

UP COMING EVENTS

6.

We will be inviting our parent body to come and speak to our students on the topic "sustainable cities and communities" I will looking forward to welcoming you to impart your knowledge and wisdom on the topic.
