

YOUTH LEADERSHIP PROGRAM (YLP)

Unveiling the Unseen Threads- Human Impact on Nature's Fury

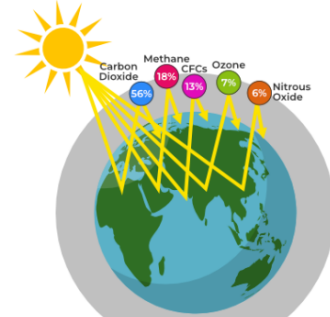

Dear Parents,
The Youth Leadership Program is a wonderful TNG initiative that teaches students about global issues. This event gives students an opportunity to tackle global issues and talk about progress and solution through Sustainable Development Goals.

Our Goal

This year, our class is focusing on "Impact of Human on Natural Disasters", aligning with UN Sustainable Development Goal 13: Climate Action

Greenhouse Gases

Your Support

Parents, we'd love for you to be part of our YLP journey!

If you're

interested or know someone who can talk about

'How human activities impacts the environment,' let us know and we will set up a meeting.

Big questions

- Which natural disasters can be attributed to human activities?
- How can we relate human activities to climate change?
- How can we protect the environment and reduce climate change?
- What are the different types of warning systems in place for various natural disasters in Qatar?

In YLP students will be encouraged to engage in thorough research and data collection to provide a solid foundation for their presentations. Utilizing reputable sources, conducting surveys, and incorporating real-world examples will enhance the credibility of their findings.

As we proceed through YLP we shall keep you posted about big questions and our research based findings. Pictures and videos from our class discussions will be shared for your reference.

Best Regards

Ms Modhurima (Class Teacher)
