

10th Youth Leadership
PROGRAMME
2023

SUSTAINABLE
FIFA

4B -TNG Alwukqir

Dear Parents,

I hope you are well. This is the second letter that we are sending to the parents to update you regarding our Youth Leadership Program. Year 4B learners are actively engaged in the analysis of Sustainable strategies of Qatar in the football world cup 2022. Students will be communicating their findings to the larger community later. Currently, they are preparing their presentations.

Big questions our learners are pondering on :

1. What are the sustainable strategies applied in the construction of stadium?
2. How has Qatar sorted waste during the construction phase of the stadiums?
3. What are the water conservation ideas?
4. How did Qatar manage waste and carbon emissions?
5. How has Qatar used its renewable energy sources?
6. How did Qatar facilitate urban connectivity?

Sustainability connects:

Environmental, Social, Human, Governance and Economic developments

Skills focused:

Research skills, communication skills, Leadership skills, Presentation skills
