

BUILDING RESILIENCE AFTER DISASTER

What is YLP?

The Youth Leadership Programme (YLP) is an annual event that TNG holds to promote global awareness amongst our students. This gives the students an opportunity to tackle global issues and talk about progress and solution through the sustainable developmental goals.

4A topic

This year, our class has chosen the topic, 'Building Resilience After Disaster': A Solution which builds resilience during and after disaster, which is in connection with the SDG, Goal 11. Sustainable Cities and Communities

As mentioned, the Youth Leadership Programme is a research based project, we are teaching our students to conduct simple research methods such as conducting surveys, interviews, web searches and developing questionnaires. We will be sharing with you soon our research questions and will ask you to support your child at home to complete the tasks.

During our YLP sessions in class, the children have been actively engaged in discussions about the root causes of disasters and measures to be resilient. Our aim this year, is to educate students and parents to become more responsible, be informed, and able to help neighbors, family, and friends.

To be aware of engagement in community or neighborhood preparedness activities.

Additionally, we would very much would like to involve our parents in our Youth Leadership Programme journey. If you wish to be a part of our discussions or know someone who could talk about food waste management, please let us know so we could arrange a meeting with you.

. As our Youth Leadership Programme journey continues, we will be updating you our big questions and big ideas. Moreover, we will be sharing with you some pictures and videos of our discussions in class. We thank you in advance for your support in this journey.
